Approach (How to read this book)	6
Chapter 1: The Science of Food as Medicine	7
Overview	7
Science of Food as Medicine	8
Chapter 2: FAQs	27
What do you mean by 'Food as Medicine'?	27
Aren't we discussing just 'plant-based' food? What's different about 'Food as Medicine'?.....	28
How do I know that these kinds of meals work? For instance, do they help with weight-loss? What proof of benefits and/or case studies can you provide?	32
Why go for processed food? Why can't I just eat 'normal' good food; consistently get a good night's sleep; and exercise regularly?	36
What are the main considerations in the Food-As- Medicine approach?	38
What should be included and what should be excluded in Food-As-Medicine meals? Is meat, fish, and dairy allowed? If not, why not and what do you use in place	

of animal protein?.....	40
How often should I eat these kinds of meals to see results? Are cheat days allowed?.....	48
Chapter 3: Conclusion	53
Appendix A: Overview of Considerations	55
